### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Upon further consideration of the combination of German reference 202 09 542 and Japanese 7-172359, as set forth in the previous Office action, and Applicant's arguments, it is determined that the German reference and the Japanese reference cannot be properly combined as proposed to meet all of the limitations of instant independent instant claims 1, 11 and 19. It is noted each of the German and Japanese references teaches a different operating relationship between the drive wheel(s), the idler roller(s), the pickup unit, and the control unit so as to define a different working arrangement for controlling the vehicle with respect to a floor track signal; therefore, it is not reasonable to pick and choose a component of one reference to replace a component of the other reference. In the Japanese reference it appears that the pickup unit is not pivotable on an axis, the pickup unit does not have at least one idle roller, and there is no suggestion that drive wheels 3 of the Japanese reference are configured to control positioning of a pivotable pickup unit. It is noted that if the structure of the German reference were to be modified to replace drive wheel 14.6 with rear drive wheels 3 of the Japanese reference, the sensors on the pickup unit of the German reference would not be able to align properly with the floor track signal to minimize deviations as the vehicle traveling along a curve path. Therefore, independent claims 1, 11 and 19 along with other pending claims depending therefrom are considered to be defined over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
